۲,

#### **DETAILED ACTION**

Claims 1-31 are pending in the instant application. Claims 29-31 are rejected herein.

Claims 1-28 have been previously indicated as allowed. The Examiner acknowledges the

Preliminary Amendment that was filed on April 25, 2002.

#### Response to Arguments

1. Applicant's arguments, see remarks, filed 10/21/2004, with respect to the rejection(s) of claim(s) 29 & 30 under 35 USC 102(b) have been fully considered and are persuasive.

Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of USP 5,766,933.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 29-31 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,766,933 to El Shami et al. (herein referred to as "El Shami").

El Shami teaches a column-type device for measuring analytes in a biological sample. An antibody is immobilized on a support (glass bead) to which an analyte label (colored dye) is pre-reacted to saturate substantially all binding sites. The complex is contacted with a biological fluid containing a specific analyte, being adapted to have displaced therefrom (mobilized) labeled analyte in an amount proportional to the concentration of the analyte. The device additionally

comprises a second solid support that is a porous white membrane of about 10 mm in thickness that may serve as a filter. The protein labeled with the chromogen may be albumin. See col. 10, Example 3; claim 1; claim 9; and claim 17.

It is noted that the El Shami device is not specifically for determining allergen levels or determining protease levels, however, a claim containing a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus if the prior art apparatus teaches all the structural limitations of the claim. Thus, the difference in intended use between El Shami and the instant invention is of no patentable consequence.

It is further noted that the second solid support of El Shami is not expressly taught as separating the molecules within the column-type device, however it is the Examiner's position that this property is inherent to the material from which the second solid support is made.

Applicant has not provided any structural limitations in the claim to refute such a conclusion.

## Allowable Subject Matter

4. Claims 1-28 are allowed.

### Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 1743

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique T. Cole whose telephone number is 571-272-1255. The examiner can normally be reached on Monday-Thursday from 6:30 A.M. to 4:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
